

Port Hills Restoration Maintenance Specifications 2013

Maintenance specifications:

- 1.0 Locate , Release, Mulch, Re-cage/remove cages (as required)**
 - 1.1 Locate all smaller plants (ie where plant is still obviously limited by grass suppression) and release as described below.
 - 1.2 Hand pull weeds from around the plant base and weed mat area.
 - 1.3 Cut grass to maximum height of 30mm, at width of 100mm minimum around outside edge of weed mat (or radius of 350mm if weed mat disintegrated) using sickle or hedgeclippers.
 - 1.4 Mulch a thick layer of cut grass on 500 x 350 mm area of weed mat to minimum depth of 60mm.
 - 1.5 Ensure all small, released plants are clearly marked with a stake.
-
